Product owners, software developers, and Scurm Master are set and ideally don't change over time; the critical part is the Release Manager role you need to define here

Goals	Team goal: Develop a high-quality, usable, and useful software solution for Bosch that addresses the company partner’s problem, while collaborating effectively, strengthening agile practices, and building industry connections.
Meeting norms	Meetings start at 12:30, and go on until 14:00. We start on time (let us know if there are any problems, if you won't attend or you will be late). Let us know in advance when you won't be able to attend, via whatsapp. We communicate outside of the team meetings on Discord (https://discord.gg/nmUEwuDyU). For every meeting there should be a moderator and time-keeper, to ensure the agenda is followed (scrum master/PO). There should be a meeting agenda prepared and sent beforehand. Meeting feedback will be prepared by the scrum master. Meeting summary will be prepared by the scrum master.
Working norms	We use pull requests and require a review. The main and dev branches is protected. We have a development branch. We do the release once a week (merge from dev to main). Code reviews for anything that goes into dev (require approval). Setup a CI pipeline. Autoformater. Do not squash commits; preferred is small commits for grading.
Coordination norms	POs will share the duties, week after week.
Communication norms	We communicate in English. We expect replies as fast as possible, preferrably within 24h.
Consideration norms	We respect each other ideas. We don't fill up the commits with AI slop: make sure you use AI responsibly.
Cont. improvement norms	Provide feedback on the team meeting. Whenever possible, share your best practices (on Discord or Team Meeting).
Rewards	Praise and appreciation upon good work! Share publicly or privately on Discord.
Sanctions	We don't think this can help team motivation
Signatures	
Scrum Master	Lisabeth Best
Product owner	Yan Medeiros da Cruz
Product owner	Tom Wendlinger
Software developer	Gulbaz Khan
Software developer	Christian Pohl

Software developer	Leonid Drobischevskiy
Software developer	Franklin Tenepo
Software developer	Felix Pasewaldt
Software developer	Jost Nadwornik

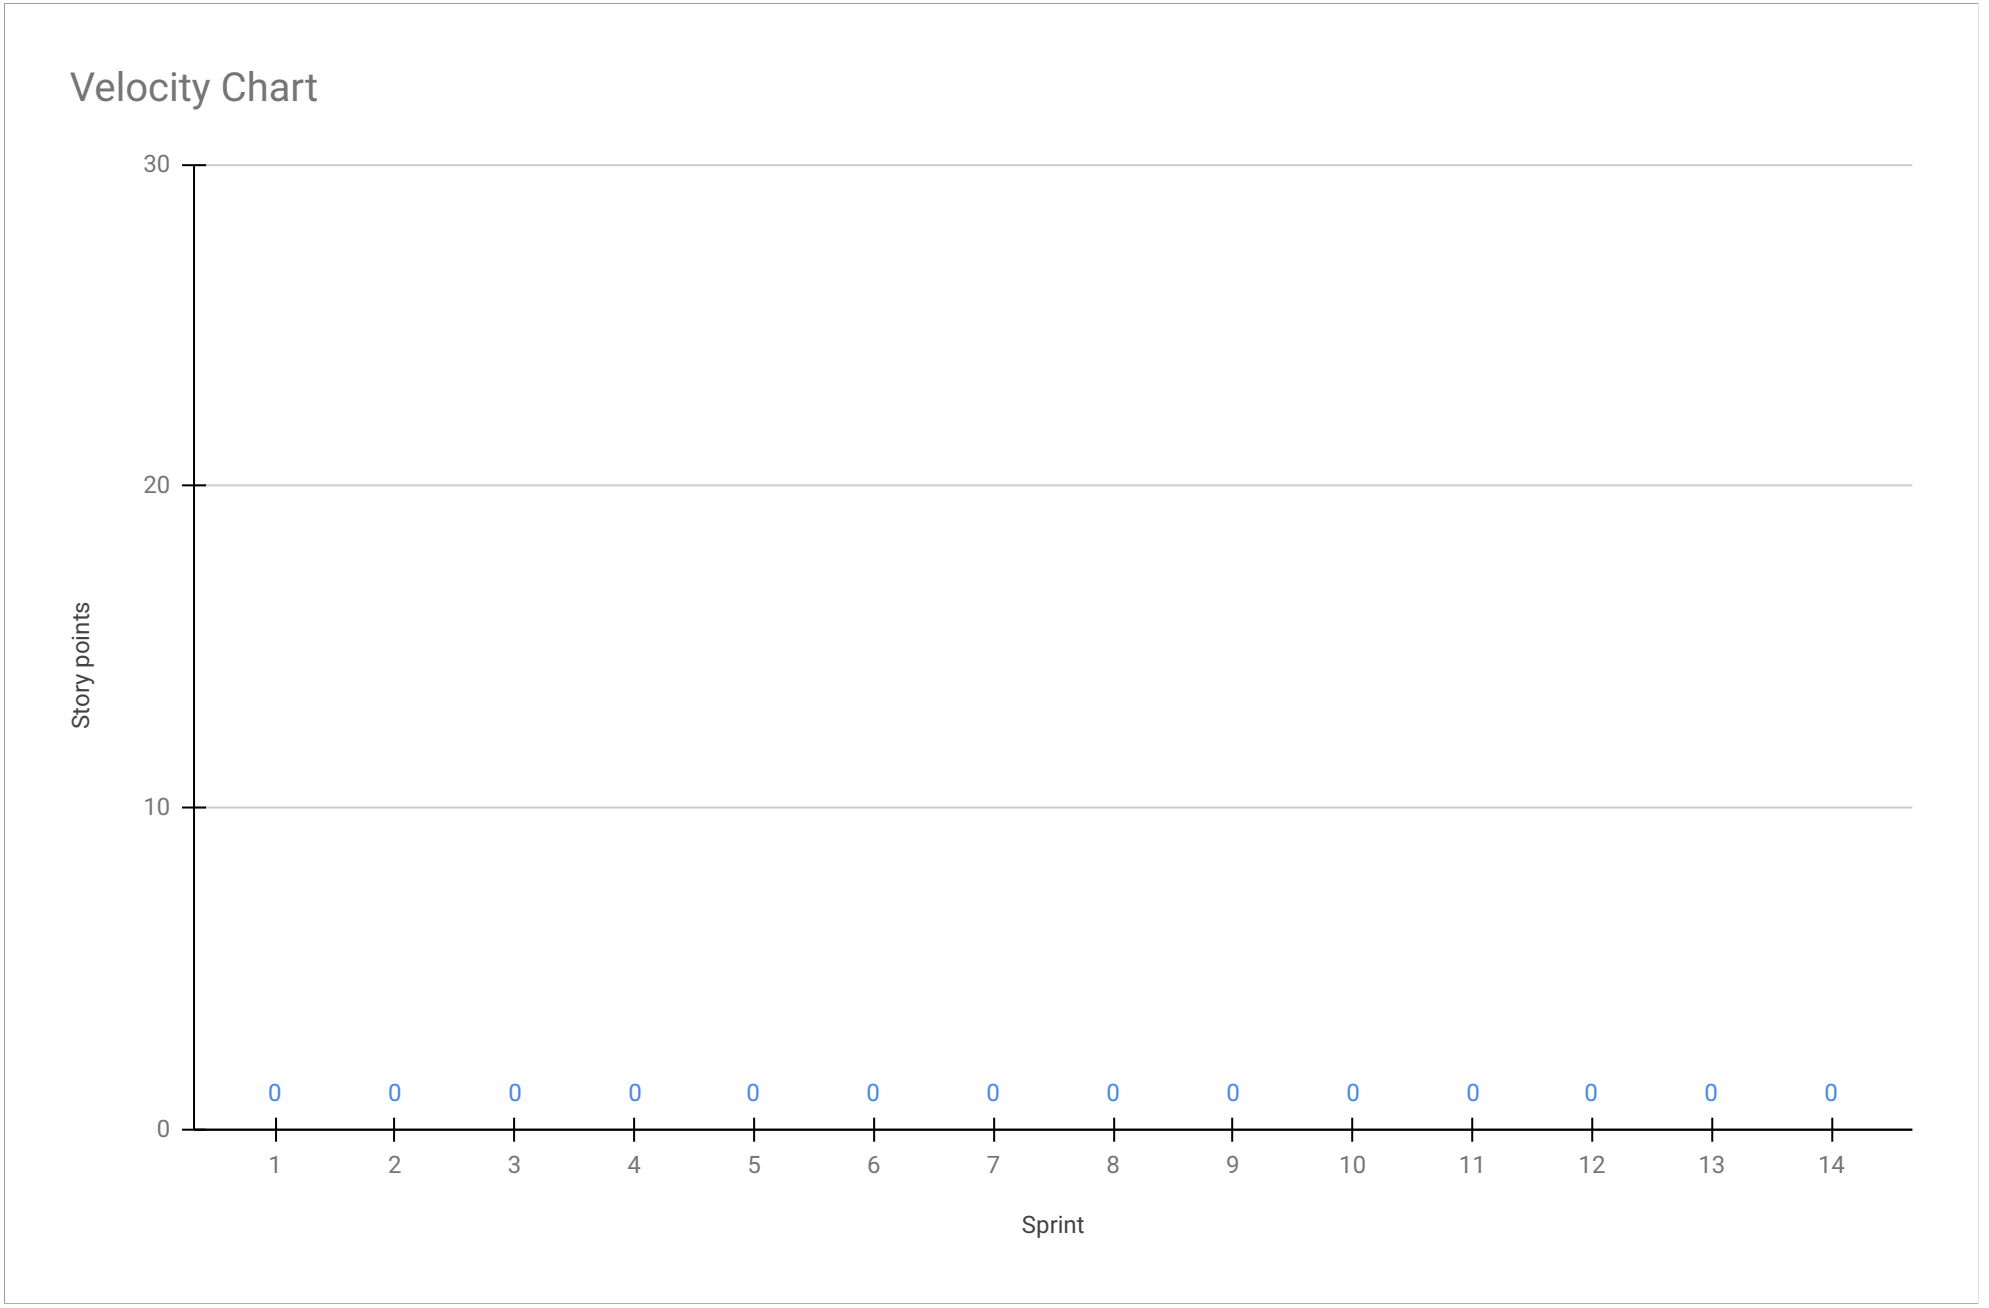

Product Vision	Project Mission
A knowledge database, LLM-readable and searchable, with an AI user interface that allows engineers both to capture their knowledge about existing products, linked to the respective CAD files and assembly groups, and to retrieve this knowledge during the design of new products.	Deliver an open-source prototype that lets Bosch engineers capture knowledge about existing products, linked to their CAD assembly groups, and retrieve it with AI during new designs.

How to play planning poker							
1. Everyone type their number into their value field, don't hit return yet							
2. Someone, perhaps a product owner, count down 3.. 2.. 1..							
3. Then, everyone hit return to submit their value
